

Lights, Camera, Action!

Reuben Steward has been signed up with Caxton's Theatre Group thanks to Housing Support workers at L&H Homes Stepping Stones project. The group teaches Reuben how to be more confident is going from strength to strength. Steve Rayner came across Reuben at Caxton's and now the couple are beginning a new challenge in creating a band together, with Reuben on drums and Steven and friend Daniel on guitar, though they are missing a bass player and are currently on the look for one to complete their band. Their dream is to eventually be able to play local venues and show people what they can do.

Reuben's other hobbies and talents include poetry, he has written two anthologies named *The Time Traveller* and *The World Beyond*. His third entitled *Firefly* is to be an autobiography and will recount Reuben's life as a traveller. Now that he has a strong support system and real comfort, he feels ready to write about his past with ease. Perhaps this is a future poet laureate or winner of X Factor?

Earthshine, taken from Reuben's book of poetry: "The Time Traveller"

Earth's a place we came to know
And how we got here just goes to show
That evolution is one thing
That all the planets and stars bring
A fascination to Creation
That Earthshine is moving round
The solar system without a sound
The sun, the moon, the sea
Gives me peace and harmony
For Earthshine for one more day
The crazy circles fade away
A faraway equation
To our only salvation
